DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species I in the reply filed on April 7, 2004 is acknowledged. However, the restriction requirement that was mailed on March 10, 2004 is withdrawn because of the existence of the fourth embodiment. Accordingly, the new restriction requirement is set forth herein below.

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: First embodiment drawn to method for depositing silicon containing amorphous film.

Species II: Second embodiment drawn to method for depositing silicon containing epitaxial film.

Species III: Third embodiment drawn to method for depositing silicon containing polycrystalline film.

Species IV: Fourth embodiment drawn to method for depositing silicon containing silicon nitride film.

3. Applicants are required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claim 1 is generic.

Applicants are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2823

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicants traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
